Total Water Care

## SYSTEM LABELING KIT

### TOTAL WATER CARE - MADE EASY

### HOW TO APPLY THE LABELS INSIDE THIS KIT.

#### Line Labels

1. Identify the plumbing lines that will require line labels.
2. Locate the corresponding GREEN line label for each plumbing line
3. Apply the appropriate label to the plumbing line, be sure the arrow is facing the correct direction, indicating flow of water
4. Store the labels that were not used

**Note:** if all the labels are not required you can keep remaining labels for future jobs, as needed.

#### Product Labels

1. Identify the water treatment equipment that you will be applying the labels
2. Locate the corresponding white label with QR code.
3. Apply the labels to the front-facing side of each piece of Kineticopro equipment
4. Ensure all labels match correctly each product
5. Store the labels that were not used

**Note:** not all labels may be required for each install job, keep the remaining for future jobs, as needed.

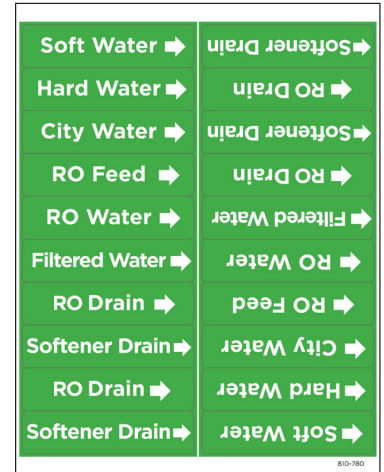

#### Wall QR Poster

1. Identify an available wall space in close proximity to our Kineticopro water treatment systems
2. Take the wall QR poster with large QR code (see image to the right).
3. Find the double-sided foam strip AND apply to the backside of the QR wall poster.
4. Be sure to clean and dry the wall space.
5. Apply the QR wall poster and be sure it is clearly visible to employees.
6. Communicate with store manager and explain the purpose and intent behind the wall poster

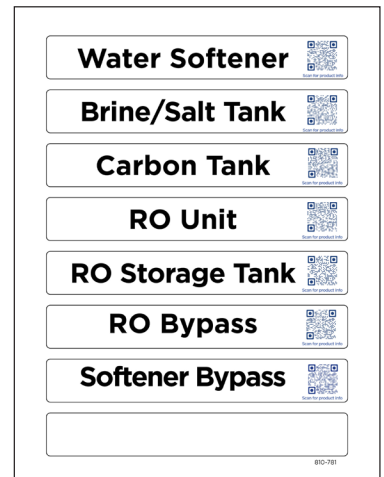

**Note:** the QR code will take the user to a landing page where they can fill out a satisfaction survey or request future service with Kineticopro
